SUMMARY

Full-Stack Software Engineer with 1+ year of experience building SaaS and enterprise web applications using React, Next.js, Node.js, and TypeScript. Comfortable owning features end-to-end – from architecture decisions to production delivery. Currently building Zoomies, a motorcycle social platform for city-based ride discovery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js (App Router), Expo (React Native), Redux, Tailwind CSS, Framer Motion, ShadCN UI

Backend: Node.js, Express.js, MongoDB, Supabase, REST APIs, GraphQL

Auth & Security: NextAuth, OAuth 2.0, JWT

Tools: Git, GitHub, Postman, Figma, Chrome DevTools, VS Code

EXPERIENCE

Frontend Developer

May 2024 – Present

Shubpy Solutions

Remote

- Engineered a secure multi-step **Document Signing Platform** with document previews, multi-method authentication, and error-resilient UX.
- Improved Core Web Vitals through code-splitting and lazy-loading, achieving **20% faster Time-to-Interactive** across SaaS products.
- Built a **Doctor Prescription Generator** with dynamic templates, signature capture, and PDF export – deployed and actively used across clinical teams.
- Took ownership of **Schedulo** (a Calendly alternative) – refactored a broken frontend, migrated to **Next.js App Router**, introduced a proper **Redux** architecture, and resolved widespread TypeScript issues blocking development.
- Restored third-party calendar integrations with **Microsoft, Google, and Zoom** that were previously broken, enabling core scheduling functionality in production.
- Bootstrapped the frontend for two internal SaaS tools – initialized repos and set up **TypeScript, Redux, Axios, and ShadCN UI** from scratch, establishing the architecture teams built on top of.
- Maintained a **reusable component library** adopted across multiple products, improving consistency and reducing duplication between projects.

Frontend Developer

Jul 2024 – Aug 2024

RenderDash Studio

Remote

- Built a responsive marketing and product website using **Next.js and TypeScript**, working closely with stakeholders to translate designs into production-ready code.
- Delivered reusable UI components and improved UX through iterative feedback cycles, reducing design-to-code back-and-forth noticeably.

PROJECTS

Zoomies | *Next.js, Node.js, MongoDB, Supabase, Tailwind CSS*

Ongoing

- Building a full-stack social platform for motorcycle riders to discover clubs, organize rides, and connect within their city – designed for scale from the ground up.
- Implemented ride creation, club management, marketplace listings, and role-based access control with clearly separated user roles.
- Architecting the backend with scalability in mind – modular API design, indexed queries, and a data model that supports city-level expansion without restructuring.

EDUCATION

SSMRV College

Bachelor of Computer Applications – CGPA: 7.9/10

Bangalore, India

2021 – 2024

CERTIFICATIONS

Diploma in Artificial Intelligence, Machine Learning & Deep Learning

2022 – 2024
